

# TPF Software Training

A flexible training program,  
customized for your needs

Providing you with a highly trained workforce

## About TPF Software

TPF Software Inc. is an IBM Business Partner and a member of the S/390 PartnerWorld program.

Over the past 25+ years, we have developed several leading products and solutions for the IBM Mainframe world and are well recognized as a leader in providing

**How can I train  
my team with  
the technical  
and business  
skills needed  
for success?**

Mainframe products and Educational Services.

TPF Software India was established in 2005 and focuses on providing Mainframe services, as well as high-level Business Consulting Services. This includes business analysis, applications development and support, applications maintenance, production and test systems support, system integration, re-engineering, migration, and more.

## Training at a Glance

- Performance and Tuning
- Utilities

### JCL

- Job Control Language
- JCL Advanced Topics

### Assembler Language Programming

- Basic Instruction Set Training
- Advanced (z) Instruction Set Training

### COBOL Programming

### CICS

- CICS Introduction
- CICS Command Level COBOL
- CICS Command Level Assembler
- CICS Macro Level Assembler

### COBOL Programming

### IMS

- IMS Database Programming
- IMS/DC

### TPF / ALCS

- TPFDF
- TPF System Internals
- TPF Assembler; TPF-C
- ALCS System Internals
- TPF / ALCS Dump Solving

### z/VM

- REXX Programming
- VM/CMS Concepts and Architecture

**We also offer courses in DB2, VSAM and more. Contact us to find out more about the courses we offer.**

## Our Educational Services

TPF Software offers comprehensive Educational Services and has developed proprietary training courses for Mainframe-related technologies. Over 700 Mainframe programmers worldwide have been trained by our instructors.

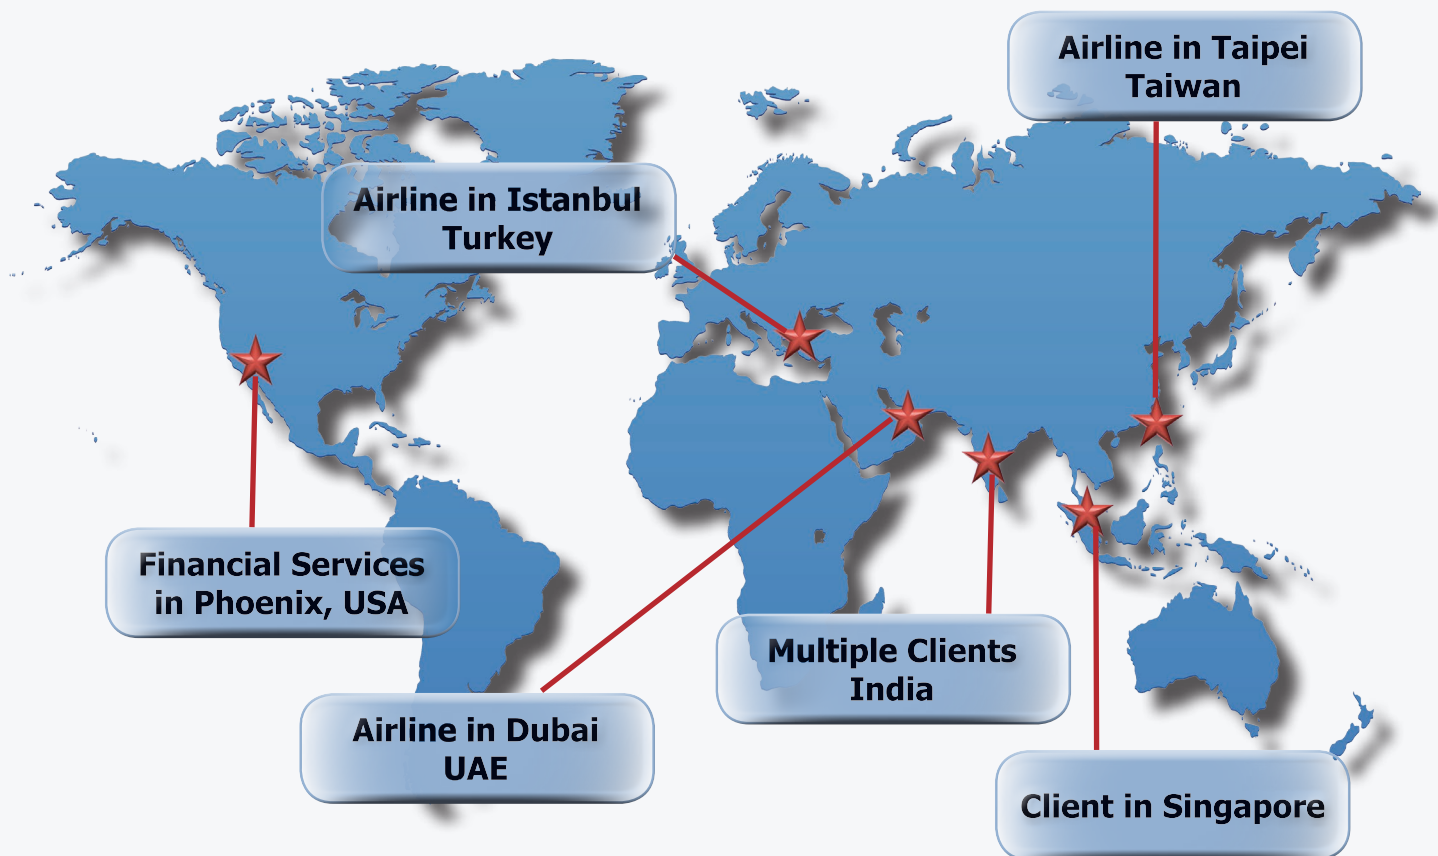

We are unique in providing training on our own in-house Mainframe training environment and products.

We have a proven track record of training a number of Mainframe professionals worldwide.

### Some of the salient features of our training are as follows:

1. Our tutors are highly experienced, practicing Mainframe professionals.
2. Our courses and tutors stress hands-on training.

3. During training, we adopt client-specific nomenclature, conventions, and usages.
4. Training is delivered using our own Mainframe, so customers don't need to provide a training environment.
5. Our courses include exercises from real world domains, such as airline, finance and hotel systems. This helps the trainees become familiar with the domains.
6. The content of our courses is flexible, and so are our tutors. This flexibility makes it easy for us to accommodate the needs of the target audience.
7. We combine technical courses with business domain training so that the trainees can relate the technology to application processing.
